

Crash-Protectors Slider

Our Crash-Protectors or Sliders protect your frame, engine and fairing of your motorcycle. This crash protector is designed to fit perfect to your motorcycle. It is made of high-strength milled aluminum and high-strength POM plastic. All our pads are screwed to your motorcycle at least at 2-3 points. The advantage over round crash protectors is that these slider can't break or snag on something on the road.

Shipment: Crash Protectors for the left and right side with mounting.

Attention! For S1000RR 2012-2014 you need to drill a hole in the fairing!
