

Driver Vario Footrest System

The Vario Footrest System (Joint) will be mounted to the motorcycle like the original footpeg. The Vario Plate (Adapter) will be mounted to the Joint and the Footpeg will be mounted to the Vario Plate. You can only use our Super Grip Footrest or our Racing Footrest. You cannot use the original footrest. You can fix the Vario Plate every 45 degree. For a better understanding you can see the complete Footpeg lowering in the Pictures 2 and 3 (all three parts must be ordered separately!). The Joint is silver anodized with EU homologation.

Fits for:

BMW S1000R

Delivery: 1 set.

Art-Nr.: 051 02 06 00

47,90 EUR

Driver Vario Footrest System (for left and right)
