

Twin Tone Horn

The Twin Tone Horn ensures with its 123,5 db (measured at a distance of 1 meter) that you get the necessary respect and that you won't be overlooked.

The horn is perfect for motorcycles because it is small and easy to install. Because of its E-approval mark it is street legal in the EU.

We offer also a mounting kit for the Twin Tone Horn. This mounting kit consists of a stainless steel mounting fitting for your BMW K1200S & K1300S and the necessary ready-to-install wiring and must be ordered separately.

Optionally, you can install a fuse at the plus cable between the battery and the relay (part no. 852863).

Have also a look at our mounting video!

Twin Tone Horn Wolo Bad Boy:

Nautilus Stebel Horn:

12V 14A (non-stop operation)

12V 18A (non-stop operation)

Height 12cm; Width 13cm; Depth 8cm

Height 12cm; Width 13cm; Depth 8cm

Doesn't work for models with alarm system if the alarm system uses the original horn!
