

Garage Trolley Plus

Article number 2012N: Garage Trolley 320kg

This stable trolley for your centre stand makes moving the motorcycles very easy.

It has a central brake which is rubber covered for use on floor tiles.

We only use high-quality wheels made in Germany!

It is suitable for very wide centre stands. Width 50cm, depth 12cm.

Of course, our garage trolley is electrolytically galvanised and has a rubber cover for the centre stand.

Article number 2015: Garage Trolley 400kg

This garage trolley is similar to article number 2012N, but two of its wheels have their own brakes so it is as well perfect for use on floor tiles and can handle heavy motorcycles without any problems.

Width 41cm, depth 22cm.

Article number 2012II: Front Wheel Adapter (fits for both garage trolleys)

This is an additional platform for the front wheel which makes moving your motorcycle even easier.

The length can be adjusted. Watch the video to see how we mount and use it!

Ask a second person for help when you use the garage trolley the first time in order to get used to it.
