

Electronic Protector

The Electronic Protector is to connect directly to the vehicle 12V battery. It fits to bike and car batteries. It protects against voltage peaks and protects against:

- Damage of electronics as result of jump starting and/or battery charging
- Short life of board lamps (extends lamp life)
- For bike and car batteries 12V

Dimensions:

Length/Width/Height: 33 x 25 x 8 mm

Cable: 280 mm

Ring connector: 8 mm

Mounting: simply to battery terminals

Art-Nr.: EP12
