

LED headlights

WL-FS-01-C-L

Our clear glass LED headlights are designed for a simple replacement of the original part and distinguishes itself by a reduced energy consumption (16W low beam / 18W high beam) which relieves the alternator.

The headlights supply pure white light and have a chromed or black metal housing. The product has the functions high beam, low beam and parking light and will be delivered including all illuminants and an original plug.

With E test mark.

Symmetrical radiation behavior, therefore suitable for right-hand and left-hand traffic!

Diameter: 20 cm, maximum depth: 13,5 cm
