

Air Intake Grid

These anodized expanded metal grids are exactly cut for the air intakes of your R1250GS. These grids protect your air filter against bigger dirt or animals without taking away the engine's necessary air to breath. Shipping contains 2 pieces (left and right).

The grid will be glued on the inside of the fairing with adhesive tape or silicone (part no. S10ml). See example video of R1200GS LC below.

Art-Nr.: R1250-G-L

13,80 EUR

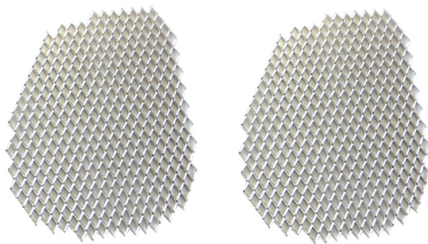

1 set (2 pieces) air intake grid

Art-Nr.: s10ml

1,20 EUR

Silicone 10ml
