HEX ezCAN GEN II Accessory Manager

With the HEX ezCAN GEN II accessory manager, you can add and configure accessory devices fast and easily without having to cut any cables. Thus, you can simply install additional lights, an air horn, accessory devices and emergency brake lights which increase your safety while riding the bike.

Easy installation:

1. Download and install the HEX ezCAN software (Mac and Windows PC): http://hexezcan.com/software/
2. Install the ezCAN under the seat (Velcro included)
3. Route and connect the ezCAN battery cables
4. Plug the ezCAN into the motorcycle CAN-Bus
5. Plug accessories into the ezCAN
6. Use the software to configure the ezCAN via USB (Mac or Windows PC)

Details and components:

- Waterproof micro USB connector
- Battery connection and fuse
- Two CAN-Bus connectors
- Four high-power outputs (10A continuous / 25A, max 20 seconds)
- Product size 76 x 30 x 16mm (2,2 x 1,2 x 0,6")
