

S100 Multi Oil

This S100 multi oil can be used to lubricate all the moving parts of your motorcycle (like for example Bowden cables, levers, joints, etc.). It is also perfectly suitable for jammed and rusted screws, soiled areas, electrical contacts, rubber and metal parts. It eliminates annoying squeaking noise and is effective on hard-to-reach areas thanks to optimal creep properties. The multi oil protects reliably against corrosion, displaces moisture, dissolves rust, grease, resin, soot, tar and oil stains and has a maintaining effect for rubber parts. Moreover, it will not resinify or attack any materials.

Aerosol can, content 300ml.

Application: Shake can before use. Apply product and allow to take effect briefly. If necessary, remove excess product. For selective application and hard-to-reach areas, attach spray head with long tube. For wide spray pattern, use spray head without tube.

Please note: Do not use in bright sunshine or on heated surfaces. Do not use on brakes and tyres.

Art-Nr.: 2450
