

Aluminium frontal plate

This frontal plate highlights the retro image of the BMW RnineT and gives your bike a unique look. The sporty windshield is made of light aluminium and is mounted by means of a fixation kit which is included in the shipment. No drilling of the fairing is necessary.

Also referred to as windshield, windscreen, shield, screen.

Install Instruction

Please compare the installation instructions and the attachment points of the windshield with your RnineT BEFORE ordering (the windshield cannot be attached in combination with every speedometer)!
