

Bobbins / Swing arm protection

With this rear stand mount (bobbins) made of high-strength, CNC-turned special plastic, you can jack up your motorcycle for all assembly work, or bring it into the perfect position and set it up. The bobbins are highly resilient and therefore also offer effective protection for the swing arms and the axle area of your motorcycle. A specially pressed-in steel bush allows the bobbins to be attached to the motorcycle with the necessary torque values, thus guaranteeing a secure and firm fit.

Art-Nr.: HSKP-8-W7

25,90 EUR

Bobbins / Swing arm protection (2 pieces)
