

FLEXX Indoor Cover

The FLEXX motorcycle tarpaulin is suitable for indoor use and reliably protects your motorcycle from dust and dirt. It is therefore ideal for keeping your motorcycle clean in winter storage. Made from scuba knit material with 95% polyester and 5% lycra, the tarpaulin has a so-called stretch fit, which means it fits around your motorcycle like a soft sock. The indoor cover has a strong elastic hem and is water-repellent and breathable. It is also paint-friendly and antistatic (dust-repellent) and comes in a practical storage bag. The tarpaulin weighs approx. 1.5 kg and is machine washable at 30°C, but must not be ironed.

The tarpaulin is available in sizes XL and XXL.

Size XL: for motorcycle lengths up to 2.40m

Size XXL: for motorcycle lengths up to 2.65m (especially suitable for K1600GTL, K1600B, R18 and all motorcycles with high windshields)
