

## Rearview mirror Victory-X

The Victory-X rearview mirrors are made of black aluminum and have a timeless shape and a complex CNC milled surface with grooves, which makes the mirror look even more elegant.

Scope of delivery: 1 mirror (1 piece)

For both sides, please order a total of 2 mirrors (2 pieces)!

The mirrors have an E-mark.

In addition to the mirrors, please order 1 adapter and 1 handlebar weight (adapter and handlebar weights are delivered as a pair)! The adapters and handlebar weights can also be designed differently depending on the model.

The high-quality aluminum caps in black (item 160314) cover the original mirror mount - thus protecting against corrosion and refining the look of the handlebars. There is an O-ring on the cylinder for an optimal fit. The caps are ideal for converting to handlebar end mirrors. The aluminum caps are supplied as a pair.

Diameter: 16 mm, cylinder diameter: 7.8 mm, depth: 11 mm
