

Adapter for pillion footrests without lowering

050020110

The original pillion footrest rubbers break very easily when getting on the motorcycle. Our Super Grip footrests, our Racing footrests, our Enduro footrests or our Multi Grip footrests can help here. To attach these, a motorcycle-specific adapter (joint) is required.

The adapter / joint is the mount for the footrest. The adapter / joint is mounted on the motorcycle like the original footrest. Only our Super Grip footrests, our Racing footrests, our Enduro footrests or our Multi Grip footrests fit. The original footrests cannot be used! You can see the complete footrest in pictures 2, 3 and 4. The footrests must be ordered separately. The joint is silver anodized.

Scope of delivery: 1 set

No lowering adapter / Vario plate can be mounted on this joint!

Compatible footrests:

Super Grip: Item 050 00 04 00 1 / 050 00 04 00 8
