

Quick Connect nickel-plated brass

Quick-release couplings made of nickel-plated brass

This high-quality quick-release coupling enables you to detach the fuel line in an instant. Both male and female couplers are self-closing, so there is no risk of spillage.

Installation is extremely simple: Shorten the fuel hose by 5 cm at a suitable point, fit the coupling, and secure with the stainless-steel clamps supplied. That's all there is to it!

Max. operating pressure: 35 bar

Seal: fluorinated rubber (internal)

Flow coefficient: 0.23

Overall length of visible coupling component: 50 mm

Length of hose nozzles: 17 mm each

Outside diameter: 16 mm

For inside hose diameter: 8 mm

A quick-release coupling comprises a male and a female coupler plus two stainless-steel clamps W4.

Art-Nr.: 13-31121
