

Vario Touring windshield

22032H

For long distance rides the Touring series was developed to minimize the windblast against the rider. These screens raise the windblast for several centimeters, allowing the rider to keep a more comfortable position riding the motorcycle.

Also referred to as windscreen, windshield, shield, screen.

The windshield has a variable spoiler that deflects the wind even better and ensures even more comfort.

420 x 345 mm (spoiler in lowest position)

485 x 345 mm (spoiler in highest position)

With European street homologation.
